HOUSING

MORTGAGES ON NONFARM HOMES OWNED AND OCCUPIED BY NONWHITE

INTRODUCTION

GENERAL

This Supplement to the fourth series of Housing bulletins presents information on the financing of homes owned and occupied by nonwhite households. The data were obtained in the Census of Housing taken as of April 1, 1940 as part of the Sixteenth Decennial Census of Population.

The subjects covered include, for first mortgages, amount of outstanding indebtedness, type of payment, frequency of payment, interest rate, and holder of mortgage; and for mortgaged properties, the value of property, existence of junior mortgages, and outstanding indebtedness on first and junior mortgages. These characteristics are shown for mortgages on 1-family nonfarm properties in structures without business owned and occupied by nonwhite households. Detailed statistics on these subjects are presented for the United States, regions, and divisions, and for those States and for cities of 250,000 inhabitants or more having 750 or more 1-family nonfarm mortgaged properties owned and occupied by nonwhite households.

Mortgage statistics for all owner-occupied 1- to 4-family nonfarm structures are presented in Volume IV of the Reports on Housing, entitled "Mortgages on Owner-occupied Nonfarm Homes" and comprising the fourth series of Housing bulletins for States. The United States Summary, constituting Part I of the volume, presents detailed data for the United States and regions, and selected data for divisions, States, cities of 50,000 inhabitants or more, and "principal" metropolitan districts, that is, those having a central city of 100,000 inhabitants or more, or a gross population of 150,000 or more. The State bulletins present detailed data for the State, for each city of 100,000 inhabitants or more, for each principal metropolitan district, and for the urban and rural-nonfarm areas of the State outside the principal metropolitan districts. Limited data are also shown for counties, urban places and rural-nonfarm parts of counties, for similar areas inside metropolitan districts, for census tracts and tracted areas, and for wards in untraced cities of 100,000 inhabitants or more.

In addition to the present Supplement to the fourth series of Housing bulletins, another Supplement, entitled "Mortgages on Owner-occupied Nonfarm Homes Built in 1935 to 1940" covers the subjects shown in the basic table of the present Supplement, and also shows data on frequency and amount of payment on the first mortgage, and estimated rental value of the home. Figures are shown for regions and States, and for selected cities and metropolitan districts of 250,000 inhabitants or more.

Related reports on housing.—Housing statistics for small areas are given in Volume I of the Reports on Housing, entitled "Data for Small Areas" and comprising the first series of Housing bulletins. Limited tabulations of housing data, including the mortgage status of owner-occupied nonfarm homes, are presented for States, for counties, for incorporated places of 1,000 inhabitants or more; for minor civil divisions, and for metropolitan districts.

Supplements to the first series of Housing bulletins, entitled "Block Statistics," include a separate bulletin for each of the 191 cities which had 50,000 inhabitants or more in 1930. Tabulations of the type presented in the first series of State bulletins (Volume I) are shown in these supplements by blocks and summarized by census tracts or wards. More detailed statistics on subjects other than mortgages are presented for census tracts in a series of bulletins on population and housing — one for each tracted area.

General statistics on housing are presented in Volume II of the Reports on Housing, entitled "General Characteristics" and comprising the second series of Housing bulletins for States.

In this volume the more important items are shown separately for the various occupancy, tenure, and color groups. Housing data are presented for States, for counties, for rural-nonfarm and rural-farm parts of counties, for urban places, and for metropolitan districts.

Further cross classifications of housing data with monthly rent or value of home are shown in Volume III of the Reports on Housing, entitled "Characteristics by Monthly Rent or Value" and comprising the third series of Housing bulletins for States. Statistics are shown for States, for cities of 50,000 inhabitants or more, and for principal metropolitan districts. Separate figures for nonwhite households are included for selected areas.

Arrangement of tables.—Table 1 presents statistics for the United States, regions, and geographic divisions. Table 2 gives comparable data for selected States, and table 3 for selected cities of 250,000 inhabitants or more.

DEFINITIONS OF TERMS AND EXPLANATIONS

Brief definitions or explanations of the terms used in this Supplement are presented in the following paragraphs. Copies of instructions to enumerators and of the occupied-dwelling unit schedule used in enumerating the mortgage data may be found in Part I of Volume II of the Reports on Housing.

Regions.—The four regions referred to in this Supplement are groups of geographic divisions. The region designated as the Northeastern States represents the grouping of the New England and Middle Atlantic geographic divisions; the region referred to as the North Central States combines the East North Central and West North Central divisions; the South represents the total of the South Atlantic, East South Central and West South Central divisions; and the West combines the Mountain and Pacific divisions.

Urban and rural areas.—The 1940 census data for population and housing are tabulated in three broad area classifications—urban, rural-nonfarm, and rural-farm. The urban area is made up in general of cities and other incorporated places of 2,500 inhabitants or more, and all territory outside these places is classified as rural. The rural area is subdivided into rural-nonfarm and rural-farm on the basis of farm residence, without regard to occupation. The statistics presented in this Supplement are restricted to properties in urban and rural-nonfarm areas, as mortgage data were not collected for farm properties in the Housing Census.

Nonwhite household.—Properties are classified by race of head of household in accordance with the definition used in the 1940 Census of Population. Nonwhite heads of households comprise heads of Negro, Indian, Chinese, Japanese, Filipino, Hindu, Korean, and other nonwhite races, and of mixed white and nonwhite parentage. Persons of Mexican birth or ancestry who were not definitely Indian or of other nonwhite race are counted as white.

In this Supplement, statistics are presented for mortgaged properties of all nonwhite races combined, except for the State of California for which two groups, Negro and "other nonwhite" are distinguished.

1-family properties.—The 1-family properties to which the statistics in this Supplement apply consist of owner-occupied mortgaged properties in which the properties covered by the mortgage contained only one dwelling unit. The properties included are predominantly 1-family detached houses, but also included are those dwelling units in attached structures which are individually owned and occupied. A dwelling unit is the living quarters occupied by or intended for occupancy by one

household. A dwelling unit or property is owner occupied if it is owned wholly or in part by the head of the household or some related member of the family living in the dwelling unit or property.

Value of property.— In reporting the value of a mortgaged property, the enumerators were instructed to ascertain from the occupant the estimated current market value of the identical property for which the mortgage characteristics were reported.

First and junior mortgages.— First mortgages, first trust deeds, and land contracts are classified as first mortgages. Any mortgage or deed of trust other than the first mortgage or first deed of trust is classified as a junior mortgage. The figures for number of properties with first mortgage only and for properties with first and junior mortgages are based on the enumerated data for the amount of outstanding indebtedness. The debt on the first mortgage and the total debt on all junior mortgages were enumerated for each property as two separate items. The enumerator was instructed to enter "none" in the space for the amount of the junior mortgage when there was no junior mortgage on the property. In many cases, however, no entry was made for the junior mortgage. It is reasonable to assume that a junior mortgage was actually outstanding in only a small proportion of such cases. In the tabulations showing the amount of outstanding indebtedness, properties having first mortgages but not reporting on junior mortgages were combined with properties having first mortgages only.

Outstanding indebtedness.— The amount of indebtedness reported for a mortgaged property is the present mortgage debt or unpaid balance, including unpaid principal and past-due interest. The reported debt on first mortgages relates to all mortgaged properties, including those where there was also a junior mortgage. The debt on first and junior mortgages is equal to the indebtedness on first mortgages on all properties plus the indebtedness on junior mortgages on those properties reporting junior mortgages.

The relation of the debt to value is based on the amount of outstanding indebtedness and value of property at the time of enumeration. No information was obtained in the census on either the original amount of the present mortgage or the date of the loan.

Interest rate.— The interest rate reported is the annual rate of interest currently charged on the first mortgage. Instructions to enumerators specified that fees and charges in addition to the regular rate of interest were not to be included.

Holder of first mortgage.— Mortgaged properties owned and occupied by nonwhite households are classified according to type of holder of the first mortgage. The relative importance of various types of holder as measured by number of mortgages

and outstanding indebtedness is affected by certain errors arising from improper reporting and classification. Enumerators were instructed to report, wherever possible, the actual holder of the mortgage, as distinguished from the mortgage company or individual who while not the current holder, may have originated the loan or acted as an agent in collecting the payments. Failure to report the actual holder in such cases, tends to create an overstatement for mortgage companies and individuals, but it is believed that this type of error is infrequent for properties owned by nonwhite households.

The data for mortgages held by commercial and savings banks are shown both separately and combined because it is believed that in some States where there are no mutual or stock savings banks, or where such institutions hold only a small percentage of the mortgages in the State, some mortgages held by commercial banks were erroneously reported as held by savings banks. In these States, the combined figures for commercial and savings banks may furnish a more accurate representation of mortgages held by commercial banks than the commercial bank figures alone. In New York and in the New England States however, and in a few other States where savings banks are important agencies in the home financing field, this error is probably less common.

The category designated as "building and loan association" includes cooperative banks, homestead associations, and State-chartered and Federal savings and loan associations. It is believed that the Housing Census data for mortgages on all 1- to 4-family properties are understated for building and loan associations and overstated for commercial and savings banks. These differences are indicated by comparisons of Housing Census data on outstanding indebtedness with estimates based on reports of associations and banks to State and Federal supervisory authorities. It is probable that differences of this type are also present in the data for properties owned and occupied by nonwhite.

Type and frequency of payments.— The basis for determining type of payments on the first mortgage was: (a) Whether or not the borrower was required to make regular periodic payments (either principal or interest or both); (b) if regular payments were required, whether or not they included an amount for reduction of principal; and (c) if regular principal payments were required, whether or not the payments also included an amount for real estate taxes. The frequency of the required payments was reported as monthly, quarterly, semiannual, annual, or other.

Averages.— The average debt and average value were obtained by adding the dollar amounts reported and dividing by the number reporting. The average interest rate was obtained by adding the interest rates reported and dividing by the number reporting.
